SEED SPECTOR LRX
Electronic Data Capture/Analysis

- LRX high speed operating software allows multi tasking
- Programmable screen displays for conventional, split and test weight data
- High Performance Analog Section for fast response
- Intelligent device interface with Analog/Digital device compatibility
- Expandable digital connections
- Interchangeable device slots
- Standard equipped with 4 relays to control remote functions
- Configurable printer port
- Multiple, programmable, calibrations per channel
- Control Port Communications for enhanced load cell and load beam response
