

ALMACO Precision+ Combine Preventive Maintenance and Fleet Services Plan

ALMACO Precision+ Preventive Maintenance Service is designed to lower your overall cost of ownership by planning your maintenance needs throughout the year for a fixed cost. This maintenance offering is specific to each machine per research program and provides you with the maximum amount of uptime each season.

ALMACO will perform this service based on your level of need. We will perform your maintenance to meet your specific schedule, either in our central service center or at your location. All maintenance parts are included and will be exchanged prior to their estimated failure rate or as needed as indicated by wear.

Each Combine Preventive Maintenance includes a 118-point service inspection/calibration. Parts and labor are covered in the Precision+ plan price.

- Maintenance Checks
- Routine Cleaning
- Replacing Components
- Other Additional Standard Maintenance

ALMACO will provide a quote of all recommended repairs and upgrades that are not covered under the Precision+ plan.

ALMACO preventive service plans are designed to maintain your combine at factory standards. This plan adjusts, lubricates, calibrates, and replaces maintenance parts prior to their mean failure rate.

Multiple unit discounts are available.

Services Outside of Preventative Maintenance Plans

Device failures outside of routine maintenance described in this document are considered repairs and will incur an additional cost for parts.
